Experience

Company Owner

Orbilon Technologies

Sep 2019 - Present (3 years 6 months)

Full-Stack Developer (C# .Net/Angular)

Upwork

Sep 2013 - Present (9 years 6 months)

With over 10+ years of development experience in C# .NET & Angular Full-stack development and having worked on more than 100+ projects during my full time freelancing career, I'm one of the top standout service providers on Upwork with ~100 finished projects.

TOP CLIENT FEEDBACK'S

=====

1) "I have been working with Ali for the last couple of years and have never found him short of ideas! We have worked on applications that required variety of technical skills ranging from C# .NET, ASP.NET MVC, ASP.NET Web API, C# .Net Core, SignalR, API integrations, SQL, Azure to the frontend technologies like AngularJS, Angular 4 and Javascript!"

H. Taub of Carbid

2) "Ali is amazing. Our team has had the pleasure of working with Ali for over a year now. He is an excellent enterprise level developer who brings great ideas and suggestions to the development project. I highly recommend him for any project you have."

Client: Trevor of DBA Platform

=====

Full Stack Engineer (C#.NET/Angular)

Carbid

Aug 2016 - Nov 2021 (5 years 4 months)

- Developed this auctions platform from scratch solving complex problems in ASP.NET MVC/.NET Core/SignalR/Azure on the backend and Angular 7 on the front-end.
- The platform has seen an amazing success and the client has been able to sell over 1500+ cars since the launch of this product.
- Integrated Cardcom Payment API to hold credit-lines and charge users using their Credit/Debit cards.
- The system handles complex real-time requests that deal with the timers, last second bid placements, declaring winners after few seconds of cushion period.

- Real-time solutions require you to have updated data all the time therefore the memory/cpu operations/requests often jump to some huge numbers in very little time but we resolved it in such a manner that all those things are kept in mind during the development

Full Stack Developer (.NET/Angular)

DBA Platform

Sep 2014 - Oct 2016 (2 years 2 months)

- Resolved development problems, improved operations and provided exceptional client support.
- Integrated Stripe, Google Business APIs to fetch GMB Posts/Photos/Reviews/Locations/Reporting, Twilio automation and developed other scheduling/automation services to support the system.
- Increased customer satisfaction by resolving the issues on-time.

Software Developer

NETSOL Technologies Inc.

Jul 2013 - Sep 2014 (1 year 3 months)

I worked as a Software Engineer in Netsol Technologies, in which i got used to writing Windows Communication Services (WCF), Windows Presentation Foundation (WPF), Windows Workflow Foundation (WWF) and Telerik rad controls.
